The Union Light, Heat and Power Company ("ULH&P") has applied for a deviation from Commission Regulation 807 KAR 5:022, Section 8(2)(a),¹ to provide non-metered gas service to future customers who request gas for gas street lighting requirements.

ULH&P represents that gas street lighting units require gas at a set pressure, and precise amounts of usage can be computed.

ULH&P will provide the construction schedule to the Commission for any new gas street lighting units no later than 7 days prior to the installation of those units. ULH&P will submit the as-built drawings of the gas street lighting units, including the regulation facilities from the gas main to burner head, within 90 days of completion of construction.
